

Scientifically grounded operator-technologist who makes complex work visible, connects technical and business teams, and builds operating mechanisms that turn emerging technology into adopted, measurable outcomes.

- ROLE ALIGNMENT
- Enterprise AI portfolio governance
- DBS / Lean deployment discipline
- Cross-functional change and sustainment
- Value realization and executive cadence

PROFESSIONAL EXPERIENCE

Vape-Jet

Director of Operations

2025 - Present

- Leads AI-first operating transformation across production, purchasing, quality, customer success, support, engineering issue flow, ERP/Odoo, Jira, HubSpot, Slack, telemetry and AI-assisted workflows.
- Connects factory, field, customer and machine-fleet signals into prioritized work, earlier risk detection, cleaner handoffs, dashboards, standard work, training and accountability.
- Works in a software-enabled robotics and machine-vision environment with approximately 1,000 fielded robots informing support and operating feedback loops.

DudeWorth

Founder / AI and Automation Advisor

2017 - Present

- Develops AI-readiness and opportunity frameworks assessing value, feasibility, data readiness, governance, adoption burden, reuse and time-to-value.
- Designs agentic workflow patterns using structured context, retrieval, AI agents, human judgment, escalation, decision records, evaluation and governance rails.
- Advises on AI-enabled operations, logistics technology, warehouse automation, AMRs, ASRS, cobots, transportation systems, network analysis and workflow design.

Amazon

Operations Management / Site Leader

2014 - 2018

- Led launch and execution for Amazon Prime Pittsburgh in a 24/7 customer-backward operating environment supporting approximately five million second-day orders annually.
- Built leadership routines, labor planning, throughput visibility, escalation paths, standard work and operating mechanisms.
- Applied Lean and Gemba practices across safety, quality, throughput, customer experience and team engagement.

Compunetics

Director of Operations and Engineering Management

2000 - 2013

- Led engineering, manufacturing, quality, customer delivery and complex technical programs in advanced electronics and high-reliability environments.
- Built quality systems, standard work, root-cause practices, performance measures and process controls; collaborated with DoD, CERN, Intel and AMD.

ROLE-ALIGNED OPERATING STRENGTHS

Portfolio governance Use-case intake, prioritization, charters, dependencies, risks, executive reporting and value tracking.	Deployment discipline Business problem framing, workflow design, human authority, pilot execution, standard work and sustainment.	Change at the work Gemba, training, communication, feedback loops, adoption measures and accountable ownership.
--	---	---

AI DEPLOYMENT METHOD

01 SIGNAL Problem, decision, user, baseline and outcome.	02 METHOD Workflow, data, platform, integration and test.	03 CONTROL Human authority, quality/risk boundary and escalation.	04 RESPONSE Outcome, adoption, quality and value evidence.	05 TRANSFER Owner, standard work, support, learning and sustainment.
--	---	---	--	--

MEASURE WHAT CHANGED

FLOW Cycle time / handoffs	ADOPTION Retained use / adherence	VALUE Business response / benefit	CONTROL Authority / exceptions	SUSTAINMENT Owner / support path	LEARNING Feedback-to-change time
--------------------------------------	---	---	--	--	--

Cardinal Building Products

2021 - 2023

Regional Director

- Built the company's first remote regional operation and modernized distributed customer, CRM, commercial, fulfillment, logistics, digital marketing, SEO and online-buying workflows.
- Advanced AI-enhanced transportation-management and route-planning concepts.

ZeusVu

2018 - 2022

Chief Pilot, Autonomous Systems and Aerial Data Operations

- Led regulated drone operations across medical, energy, logistics, real-estate and restricted-airspace contexts with a 100% safety record and no FAA incidents.
- Developed TensorFlow-based concepts for automated aerial inventory and computer-vision-enabled field intelligence; designed medical delivery and chain-of-custody concepts.

Enviro Social Capital

2014 - 2017

Chairman of the Board

- Co-founded and led a public-private impact initiative; helped shape and evaluate a \$200 million Social Impact Bond feasibility concept for Pittsburgh green infrastructure.

IEEE

2012 - 2016

CMPT and EDS Pittsburgh Chapter Chair

- Led regional technology programming connecting industry, academia, STEM outreach, electronics, manufacturing and emerging technology.

EDUCATION

University of Pittsburgh

Bachelor of Science

Materials science, physical chemistry and biology-related studies; [academic work indexed on Google Scholar](#).

CREDENTIALS

1. Google AI Essentials

2. IBM Enterprise Design Thinking Practitioner

3. Six Sigma Certification

4. OSHA 10

TRANSFERABILITY EVIDENCE

01 AI-FIRST OPERATIONS	Current cross-functional work across ERP, CRM, telemetry, production, quality, support and engineering issue flow.
02 SCALED OPERATING CADENCE	Launch discipline, daily management, standard work and escalation in a 24/7 customer-backward environment.
03 SCIENTIFIC AND HIGH-RELIABILITY CONTROLS	Materials science and physical chemistry grounding combined with engineering-to-operations translation, quality systems, root cause and process control.
04 REGULATED AUTONOMY	Governed field deployment, chain-of-custody concepts and a verified 100% safety record with no FAA incidents.

TECHNICAL & OPERATING TOOLKIT

Agentic AI | LLM workflows | RAG patterns | Human-in-the-loop design | Python | SQL | JavaScript | TensorFlow | Tableau | ERP/Odoo workflows | Jira | Confluence | HubSpot | Slack | GIS and mapping workflows

SCIEX FIT THESIS

Combine scientific grounding, DBS rigor, technical translation and operating ownership so AI initiatives become controlled, adopted and measurable parts of everyday work.
